

## FULL SCALE DNA SEQUENCING!

*We predict that 25% of Americans will know their DNA by 2025. People will use their unique information to optimize their health and wellness. Become one of the first!*

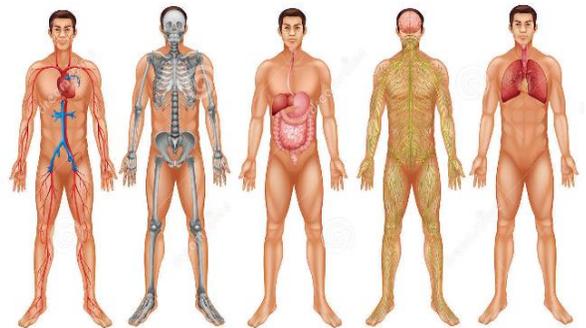

### Analysis of All 22,000 of Your Genes

- We use a technology called “Whole Exome Sequencing,” which is dramatically broader than older tests like 23andMe that look at DNA only in a few discrete locations
- Wider coverage means we are far more comprehensive in DNA mutations that impact your health
- Hundreds of doctors have chosen us as the most powerful and scientific DNA test for their patients

### What Our Test May Reveal About You:

- Your risk for 1000s of diseases, e.g. cancers, heart disease, heart attack, stroke, hypertension, diabetes, Alzheimer’s, asthma, arthritis, MS, anemia, etc. etc.
- Which diets and fitness regimens work best for you & most effectively address your unique health issues
- Which medications may be most effective for you
- Traits you may pass on to children & your ancestry

**Take Charge of Your Health** – Learn if there are actions you can take now to mitigate current health issues or prevent future problems. (Always consult with a doctor first.)

**Your Information Is Yours** – You and doctors you choose can access your results at any time on our secure web portal.

**Doctor Ordered** – The FDA requires tests of our magnitude to be ordered through a doctor. Ask us for materials to show your doctor, or ask us for a referral to a doctor in our network.
